Question 3: Pseudocode

1. Start
2. Input "age"
3. If age > 18
    Input "char" for eyesight
    If char = 'p'
        Input "char" for written test
        If char = 'p'
            Input char for driving test
            If char = 'p'
                If age < 60
                    print "eligible to drive"
                else
                    Input "char" for med. certific
                    If char = 'y'
                        Print "eligible to drive"
                    else if char = 'n'
                        Print "need med. certific
                    else
                        print "invalid input"
            else if char = 'f'
                print "you need to retake the
                    driving test"
            else
                print "invalid input"

```
        else if char = 'j'
            print "you need to retake the written
                  exam".
        else
            print "Invalid input"

    else if char = 'f'
        print "you need prescription for glasses"

    else
        print "Invalid input"
else
    print "you are not eligible to drive"

End if
End
```
